COMMERCIAL HEATING + COOLING

SOLUTIONS

CLIMATE CONTROL WITH VIEGA® RADIANT SYSTEMS

Improves the environment, inside and out. Radiant systems only deliver heat where it is needed, meaning greater zone control during and off peak hours. These highly efficient operating parameters can ultimately reduce energy consumption.

Meet your net-zero goals. Improving your HVAC system is imperative to meeting net-zero goals. The U.S. Department of Energy reports show that, given the amount of energy consumption traditional HVAC systems require, the most practical approach is to greatly reduce energy needs through efficiency gains.

Spread comfort, not pollutants. By reducing the amount of air being circulated, radiant heating and cooling improves the air quality within a space by spreading fewer pollutants including allergens, viruses, and odors.

Safe, secure, end-to-end solutions. Viega not only features a full line of radiant solutions, but also multiple pipe fitting systems with over 2500+ approved applications. From potable water, gas, radiant, snow melt, fire sprinkler, compressed air, fuel systems, and more - Viega has a solution for your piping project.

viega

CLIMATE MAT

A pre-engineered mat that simply needs to be unrolled and fastened, saving time and labor costs. This system can allow for 20,000 sq. ft. of tubing to be installed in an average workday.

MANIFOLD

Comes equipped with an air bleeder, supply shutoff, purge valve, and balancing valve to round out your radiant system.

HYDRONIC MIXING BLOCK

For supply temperature modulation, featuring 7 settings with a permanent magnet motor design that reduces power consumption by 50%.

BARRIER PEX

Barrier PEX is our premier solution for snow melt applications. Barrier PEX can also be used in continuously recirculating plumbing systems at temperatures of up to 140F while still maintaining excellent chlorine resistance.

PROPRESS®

With over 400 different fitting combinations and more approved applications than any other copper press fitting system, Viega ProPress is the proven solution for nearly any commercial piping project.

MEGAPRESS® G

Safe, efficient lines for gas and fuel oil applications has never been easier. Viega MegaPress G has over 150 fitting combinations and features piping from sizes 1/2" to 4".

”

Engineering Services

Our dedicated Engineering Services team can help complete your next plumbing, radiant, and snow melt project, just to name a few. They work with you to provide a complete fitting material list, model, and cost comparisons for press vs. alternative installation methods.

Viega Works Session

Can't make it to one of our Seminar Centers? No problem. Our trainers bring real-world experience and industry knowledge to your location via video call in a working session tailored to your needs.

Technical Support

Our Technical support team has you covered if you need quick answers to on-the-job questions. Each technician provides detailed troubleshooting and solutions to application questions.

On-Demand Accredited Courses

Contractors can get on-demand access to modules for continuing education, credentialing of Viega products and industry applications through the Viega eLearning portal.

In-Person Training

The Viega Training team provides a hands-on experience in well-equipped labs and seminar spaces for customers in Broomfield, CO and Nashua, NH.

VIEGA® PRESS TECHNOLOGY

No other manufacturer can offer the same press technology across multiple piping systems.
