

The Viega logo is displayed in a bold, yellow, sans-serif font. It is positioned in the upper left corner of the page, above a black horizontal band that contains the main headline. The background of the top half of the page is a blurred image of a laboratory or industrial setting with various glass vessels and equipment.

CLEANED AND BAGGED

CONFIDENCE STARTS WITH CLEANLINESS

OVERVIEW:

Viega Cleaned and Bagged systems are designed to protect purity while delivering the speed and reliability of proven Viega press technology, giving customers complete confidence in high-purity installations.

In high-purity systems, cleanliness directly impacts safety and long-term reliability. Viega Cleaned and Bagged systems undergo a controlled cleaning process and are sealed in protective packaging to help reduce contamination before installation, delivering a ready-to-install solution for environments where system cleanliness and installation efficiency are critical.

DESIGNED FOR 6N PURITY GAS SYSTEMS

Viega Cleaned and Bagged systems support applications requiring 6N gas purity (99.9999%), supporting demanding manufacturing and research environments where purity is critical.

WHY CLEANED AND BAGGED?

- Installation-ready delivery - factory-cleaned and sealed fittings and valves
- Reduced contamination risk during handling and installation
- Removes particles, hydrocarbons, VOCs, silicone, salts, chlorides, fibers, and corrosion products to specific levels
- Supports high-purity system performance
- Fast installation with proven Viega press technology
- Consistent, repeatable connections
- Backed by Viega engineering expertise and warranty support

DESIGNED FOR HIGH-PURITY INDUSTRIES

Viega Cleaned and Bagged supports applications where system cleanliness helps preserve gas purity and operational reliability, including:

- Pharmaceutical manufacturing (cGMP-regulated facilities)
- Automotive and specialty paint manufacturing
- Advanced manufacturing
- Semiconductor and microelectronics manufacturing
- Research laboratories
- Precision manufacturing environments
- Industrial gas distribution systems

PROVEN PRESS TECHNOLOGY. ELEVATED FOR CLEAN APPLICATIONS.

Viega press systems eliminate hot work while providing secure, consistent connections. Cleaned and Bagged fittings and valves cleaned for oxygen service extend these advantages into applications requiring controlled cleanliness.

- No flame or hot work
- Reliable press connections
- Reduced installation preparation
- Compatible with existing Viega press tools*

See installation instructions for tool compatibility.

FEATURES / TECHNICAL VALUE:

CONTROLLED CLEANING PROCESS

Viega Cleaned and Bagged follows recognized industry cleaning practices designed to reduce contaminants that could affect sensitive systems. Referenced standards include:

- ASTM G93 - Cleaning methods and cleanliness levels
- CGA G-4.1 - Oxygen system cleaning practices
- CGA G-7.1 - Commodity Specification for Breathing Air
- MSS SP-138 - Cleaning guidance for valves and fittings
- ISO 8573 - Compressed Air: Contaminants and Purity

Each fitting and valve is cleaned, inspected, and sealed prior to shipment to maintain cleanliness through delivery and installation.

SEALED FOR PROTECTION

After cleaning, fittings and valves are individually packaged to help prevent contamination during transport and jobsite handling.

This packaging:

- Maintains cleanliness until installation
- Reduces jobsite preparation
- Supports controlled installation workflows

NOT APPROVED FOR

- Medical gas systems
- Food-contact applications

PART OF THE COMPLETE VIEGA PRESS SYSTEM

Viega Cleaned and Bagged fittings and valves integrate with the Viega press portfolio, allowing contractors and engineers to standardize on one installation method across applications. Benefits include:

- One trusted manufacturer
- Proven press technology
- Engineering and technical support
- Consistent installation practices
- See pricing list for most up to date offering
