Viega Tool Matrix

Viega and other tooling manufacturers offer a variety of press tools and jaws for every fitting size across every system. In many cases, the same power tool can be used across Viega systems to make presses on different products.

It's the obligation of the installer to verify correct functionality of their selected tool platform according to the manufacturer's instructions. It's also the obligation of the installer to determine the compatibility of the tool and its attachment with the fitting being pressed.

Platforms included in the below tables ***do not reflect*** a preference for tooling. The tables show a selection of tools and accessories compatible with Viega fittings and valves.

This document is subject to updates. For the most current Viega technical literature, please visit www.viega.us.

Viega products are designed to be installed by licensed and trained plumbing and mechanical professionals who are familiar with Viega products and their installation. **Installation by non-professionals may void Viega LLC's warranty.**
