Viega® Hotel Solutions

Engineered for an excellent guest experience
Whether for a speedy installation process or to make repairs in a facility simple, Viega products are a clear winner for the hospitality industry. Multiple benefits like the highest level of approved applications and key codes and standards make Viega the top choice for hotels, gaming and other related venues. From potable water to gas lines to in-wall flushing technology products, Viega has a variety of solutions for every need.

In the event of repairs, operations at a location can continue as normal with little-to-no interruptions of service. No unavailable rooms or displaced guests are necessary, which leads to a more positive guest experience. With Viega’s pressing technology, smoke detectors do not need to be disabled and no fire watches or burn permits are required. Use Viega’s patented SmartLoop® configuration, double drop elbows and venturi tees to help ensure clean water is delivered to your guests.
Many Viega products can be pressed in seconds, a significant time savings over traditional joining methods. There’s no wait time for curing or drying, so pressure tests can be performed immediately.

Viega press fittings are simpler and safer to install than traditional methods. Installations can be made anywhere, in any condition. Unlike grooved and threaded connections, you don’t have to jeopardize the integrity of the pipe to get the dependable connection you need.

With Viega’s Smart Connect® technology, you’ll know every connection is made correctly. Smart Connect helps easily identify unpressed connections, so if one was missed it’s easy to locate and press without having to drain the system.

Viega is a trusted leader in press technology, so build with confidence. With a heritage of engineering press fittings for a variety of materials and strict quality control, you’ll know you’re getting the very best when you choose Viega.

With no welding or soldering flames, fire watches are unnecessary. That means there’s no need for additional manpower, plus you can skip the messy or labor-intensive tools.
**Viega ProPress® System**

Viega ProPress is an excellent choice for potable water needs in a hotel. It can also be used for cooling lines, and in some cases ProPressG is used for gas lines, depending on the jurisdiction. With more than 600 different fitting configurations to choose from, ProPress is approved for more applications than any other copper press fitting system. It is available in sizes $\frac{1}{2}$" to 4", and three different sealing element options mean ProPress can be used in the same system for different applications.

**Viega MegaPress® System**

Viega MegaPressG is often used to pipe gas to mechanical rooms in hotels and other large buildings. Viega MegaPress is the first press fitting system for carbon steel pipe suitable for water, compressed air and gas applications. The product line also includes MegaPress Stainless for fittings sized up to 4". MegaPress is suitable for use with Schedule 5 to Schedule 40 carbon steel pipe, plus the clean and quick pressing method reduces cleanup and callbacks. MegaPress has a 50-to-90 percent installed cost savings.
Viega PureFlow® System

Viega PureFlow System, using 2” commercial PEX, is another great choice for providing potable water in hotels. PureFlow System is a complete PEX plumbing solution that is easy to install and can help reduce water waste. With fittings, manifolds and tubing, Viega has it all. Fittings are available in high-performance polymer or Zero Lead bronze, and factory assembled fittings reduce installation errors on the job site.

Viega Flushing System Technology

An aesthetically-pleasing bathroom completes the overall hotel room experience. By moving the carrier inside the wall with Viega’s in-wall flushing systems, you gain space in the bathroom for more room and design possibilities. Lifting the toilet off the floor makes cleaning the bathroom easier, and in-wall flushing systems are simple to install and easy to maintain. Choose from a variety of flush plates with sensor technology, IR and remote button options.
Stowe Mountain Lodge | Stowe, Vermont

Viega ProPress copper manifolds were installed throughout the Stowe Mountain Lodge, along with PureFlow tubing for the domestic water system. Viega’s unique hybrid solutions make pressing connections between copper and PEX easy and secure.

Stowe Mountain Lodge is a 139-room luxury condo and hotel. It is located at the base of Mount Mansfield, the highest mountain in Vermont, and offers year-round fun including ski-in/ski-out accommodations and a rejuvenating spa.

Dorado Beach, a Ritz Carlton Reserve | Dorado, Puerto Rico

Dorado Beach installed both Viega ProPress and Viega PureFlow systems in a time-saving hybrid application. ProPress up to 2” in diameter was used for chilled water, and Viega PureFlow up to 1” in diameter was used for the potable water systems. The property was built to LEED® Silver standards and is one of the top 100 most sustainable hotels in the world.

Dorado Beach is the second Ritz-Carlton Reserve hotel worldwide and the first in the Americas. The AAA Five Diamond hotel features 115 guestrooms spread across 50 acres and guests are just steps from the Atlantic Ocean along the resort’s one mile of beachfront.

Residences at Little Nell | Aspen, Colorado

Viega ProPress was used for the hotel’s mains and branches for its potable water lines, ranging in sizes ½” to 2”. Service for approximately 1,300 individual units in the hotel were plumbed with the ProPress system.

The landmark hotel has hosted A-list celebrities, United States Presidents and world leaders. After a $160 million renovation in 2016, the hotel has nearly 2,000 total units and almost 60,000 square feet of meeting space.
