

Viega PureFlow® System Commercial solutions

Trust Viega PureFlow System for your next commercial PEX installation. Choose a system that is free of solder, glue and the risk of micro tears in cold expansion. Viega's system allows for immediate pressure testing with connections made in seconds instead of minutes. Plus, the PureFlow tool platform is the only one in the industry that can be used for copper, stainless and carbon steel installations.

Viega. Connected in quality.

viega

Large diameter PEX

Viega PureFlow PEX tubing is available in sizes ¾" to 2". It offers flexibility of installation while maintaining performance in residential, light commercial and commercial applications. PureFlow PEX carries the highest ratings of UV and chlorine resistance according to industry standards, and maintains approximately 10% higher burst pressures than typical PEX-a tubing.

Ball valves

Made of Viega's same unique Zero Lead silicon bronze alloy, PureFlow Press commercial ball valves offer the same reliability and quality you experience with Viega ProPress. Ball valves are designed with double-stem seals to provide years of leak-free operation. Available in 1", 1¼", 1½" and 2" sizes.

Transition fittings

With Viega you have access to a diverse line of products for a variety of applications. Viega's press technology allows for easy transition between those materials as you maximize the benefits of each of the systems. With the only adapter transitioning from ProPress Copper to PureFlow Press, you can easily transition materials from our CTS press systems to our PureFlow PEX system with the same tool.

Pipe trays

Viega's pipe trays allow for the hanging of large diameter PEX with similar hanger spacing to metal products, reducing labor and install time. These trays are compatible with PureFlow PEX and Viega Barrier tubing and are made of steel. They are E84 listed for plenum use and available for ½" to 2" tubing, in 10-foot lengths.

FREAKISH PERFORMANCE

THE AMAZING VIEGA PUREFLOW SYSTEM

Testimonials of Astonishment

"My crew can install all kinds of PEX, but the Viega PureFlow System is by far the easiest."

– Dan Metcalfe, Owner Taps Plumbing

"We used to use an expandable PEX system, but it's tough to install in the winter – when you try to expand plastic when it's cold, it doesn't want to do it. I started looking at the Viega PureFlow System and realized it would solve a lot of the problems we had been having."

– James Music, General Manager, Anytime Mechanical
