The Viega standard of excellence demands perfection in every product we engineer. No matter the product, you can trust that a Viega system won’t let you down. Viega system solutions are engineered, manufactured, designed and tested time and again because we know true quality means not compromising on what matters – standards, reliability and performance.

Whether you’re installing a potable water system or a corrosive chemical line, Viega offers a system solution that is engineered and easy to install. Viega is the only manufacturer with press systems in multiple pipe joining materials, whether copper, stainless or carbon steel, or copper nickel, and our systems are approved for use in the largest range of applications.
Many Viega products can be pressed in seconds, a significant time savings over traditional joining methods. There’s no wait time for curing or drying, so pressure tests can be performed immediately.

Viega press fittings are simpler and safer to install than traditional methods. Installations can be made anywhere, in any condition. Unlike grooved and threaded connections, you don’t have to jeopardize the integrity of the pipe to get the dependable connection you need.

With Viega’s Smart Connect® technology, you’ll know every connection is made correctly. Smart Connect helps easily identify unpressed connections, so if one was missed it’s easy to locate and press without having to drain the system.

Viega is a trusted leader in press technology, so build with confidence. With a heritage of engineering press fittings for a variety of materials and strict quality control, you’ll know you’re getting the very best when you choose Viega.

With no welding or soldering flames, fire watches are unnecessary. That means there’s no need for additional manpower, plus you can skip the messy or labor-intensive tools.
Viega MegaPress System

CLEAN, SAFE, SECURE
IRON PIPE SIZE CONNECTIONS
The first press fittings for carbon steel hydronic and gas systems

You can do more with the Viega MegaPress system. Whether using MegaPress for hydronic applications or MegaPressG for gas applications in carbon steel pipe, Viega MegaPress is flameless and eliminates heavy equipment and messy joining materials.

Viega MegaPress fitting connections can be installed without completely draining a system. Viega MegaPress is ideal for new installations or for repairs on existing systems.

Suitable for use with Schedule 5 to Schedule 40 carbon steel pipe, the Viega MegaPress system includes more than 400 different engineered fitting configurations ranging in size from ½” to 4”. MegaPress and MegaPressG are approved for more applications than any other carbon steel press fitting system and make secure connections you can trust.

Also designed for Iron Pipe Size (IPS) stainless steel, Viega MegaPress Stainless fittings are available in 304 and 316 stainless steel. MegaPress Stainless offerings make efficient connections possible for more applications than ever before.

Another product in the MegaPress family is MegaPress CuNi, a 90/10 copper nickel alloy perfect for marine and industrial pipe joining applications.

For fittings 2½” to 4”, use the MegaPress XL PressBooster to make larger-sized connections. This unique tool extends the travel of the ram to increase force, necessary for the larger connection.

“The cost savings on labor is huge with Viega MegaPress.”

-Tracy Auen, Owner, A&G Piping, Ft. Worth, TX
Ideal for industrial, commercial, residential and marine applications, the Viega MegaPress system is easy to use, flameless and reliable. The system performs well in both new installations and retrofit projects. MegaPress leaves no joining material buildup, exposed threads or tarnish, creating a clean, professional appearance.

With a variety of sealing elements in multiple sizes, Viega MegaPress products always offer the right solution for the application. For example, a specially-formulated HNBR sealing element is used in MegaPressG fittings. We also offer an FKM sealing element that shows great chemical resistance and an EPDM sealing element for water, glycol and ketone applications. MegaPress Stainless is available in 304 stainless steel with an FKM sealing element or 316 stainless steel with an EPDM or FKM sealing element. Additionally, MegaPress CuNi is a 90/10 copper nickel alloy with an FKM sealing element, specifically for marine and industrial applications.

MegaPress system applications:

- Chilled water
- Compressed air
- Fire protection
- Fuel oil
- Hydronic heating
- Low-pressure steam
- Natural gas
- Vacuum (to 29.2 in. Hg)
- Acetone
- Diesel fuel
- Vegetable oils
- Engine oils
- Gear grease
- Hydraulic fluid
- Transmission fluid
- Nitrogen
- Argon
- Carbon dioxide

Approved applications depend on alloy and sealing element. For more specific information on applications for Viega MegaPress, contact Viega Technical Services at (800) 976-9819.

For a list of applications, please reference viega.us.
Viega MegaPress is UL and FM certified for fire protection applications in sizes ½” to 4”. As with other Viega press systems, Viega MegaPress fittings can be used in pre-fabricated assemblies, producing a straight, clean installation. And with Smart Connect technology, installers can verify that all fittings in pre-fabbed assemblies are secure.
Solutions for copper and stainless systems

Viega was the first to offer time-saving press technology in multiple materials in North America and the first to offer a proven method to verify secure connections.

Since its introduction in 1999, ProPress has reduced overall job costs, saved time and increased reliability on jobsites across the globe. ProPress has more than 800 fittings in multiple configurations for copper and stainless. It’s approved for nearly 1,000 different applications. Press technology decreases labor time by up to five times, compared to other installation methods. Press is also flameless, so there’s no need for burn permits and fire watch like with sweating or brazing. ProPress is offered in copper, Zero Lead bronze, and 304 and 316 stainless steel. Copper, Zero Lead bronze and 316 stainless come with a factory-installed EPDM sealing element in sizes 1/2" to 4". Exchangeable FKM sealing elements in 1/2" to 4" and HNBR sealing elements in 1/2" to 2" are also available. ProPress 304 stainless steel comes standard with an FKM sealing element.

“With the Viega ProPress Stainless system, we were able to put everything back online within a couple of hours. That’s what really made me a believer in Viega ProPress.”

- Dave Ruby, Vice President and Project Manager, Progressive Mechanical, Clackamas, OR
Viega ProPress

THE RECOGNIZED LEADER IN COPPER PRESS TECHNOLOGY

Viega ProPress is the proven solution for nearly any industrial, commercial or residential project. With three choices in sealing elements, Viega ProPress systems can be customized to suit nearly any application, from potable water to solar systems.

ProPress applications include:

- Argon
- Carbon dioxide
- Chilled water
- Compressed air
- Cooling water
- Ethanol
- Fire protection
- Gray water
- Hydronic heating
- Kerosene
- Low-pressure steam
- Nitrogen
- Oxygen (non-medical)
- Potable water
- Vacuum (to 29.2 in. Hg)

For more specific information on applications for Viega ProPress, contact Viega Technical Services at (800) 976-9819.

For a list of applications, please reference viega.us.
Viega ProPress Stainless

COMPLETE STAINLESS SOLUTIONS FOR NEARLY ANY APPLICATION

Viega ProPress Stainless is engineered for harsh industrial environments where the piping systems may come into contact with corrosive cleaning liquids. Available in two grades of stainless steel, 304 and 316, ProPress Stainless provides reliable performance whether you need 316 stainless for a potable water line or 304 stainless for a corrosive chemical line. Please note that the system is tested to work with Viega proprietary pipe and will not be warrantied with any other manufacturer’s pipe.

ProPress Stainless applications include:

- Acetone
- Acetylene
- Acids
- Ammonia
- Argon
- Caustic solutions and vent piping
- Chemical process lines
- Chilled water
- Compressed air
- Condensate
- Deionized water
- Diesel fuel
- Ethanol
- Fuel oil
- Greywater
- Hydrogen
- Hydronic heating
- Isopropyl alcohol
- Kerosene
- Low-pressure steam
- Lube oils
- Methanol
- Nitrogen
- Oxygen (non-medical)
- Potable water
- Sludge
- Steam condensate
- Toluene
- Urea
- Vacuum (to 29.2 in. Hg)

For more specific information on applications for Viega ProPress, contact Viega Technical Services at (800) 976-9819.

For a list of applications, please reference viega.us.
Viega Ball Valves

FOR CARBON STEEL, STAINLESS STEEL AND COPPER

Viega ball valves are engineered for press technology to fit seamlessly into Viega systems, whether they are for copper, stainless or carbon steel. Like all Viega products, ball valves have a flameless connection and provide time savings. They carry Smart Connect technology, which helps identify unpressed connections quickly during pressure testing.

MegaPress three-piece ball valves are perfect for a variety of industrial applications. With a 316 stainless body, the valves can be used on carbon or stainless steel pipe. The three-piece design allows for repair if needed. The valve features an ISO mounting pad and locking handle.

ProPress Stainless valves are made of 316 stainless steel and are available for potable and hydronic applications. In two- and three-piece configurations, stainless valves come in sizes ½" to 2".

Valves for copper systems are available for potable water and hydronic applications. They come in a variety of configurations including ball, check and butterfly. Zero Lead bronze valves are certified to NSF/ANSI 61 & 372 (includes Annex G), and were developed specifically with pressing in mind. The valve features an ISO mounting pad and locking handle, and is available in sizes ½" to 2".

Approvals

- IAPMO/ANSI Z1157
- NSF®-61-372
- NSF®-U.P. Code
- Listed by NSF to Commercial Hot

Ratings

- Temperature range: 0 – 250 °F
- Cold working pressure: 250 psi

Temperature ratings are dependent on sealing element and application. Reference the approved applications sheet for ProPress for more information.
Ball Valves for Carbon and Stainless Steel

Choose the valve that works for you

- Fast installation of valves with no adapters
- Available in ½” to 2”:
  - Carbon steel with EPDM and FKM sealing elements
  - 304 stainless steel with FKM sealing element
  - 316 stainless steel with EPDM sealing element
- Cold press technology eliminates the need for fire watches or hot work permits
- No contamination caused by thread cutting oil or filings

**Components**

1. Lockable lever handle, stainless steel 304
2. Body – stainless steel 316
3. Bolts – stainless steel 304
4. MegaPress Connections – multiple materials
   - Full port ball – stainless steel 316 (excludes 2”)
   - Blowout-proof stem – stainless steel and PTFE

**Approvals**

- TSSA ASME B31
- IAPMO/ANSI Z1157
- NSF®-61-372
- NSF®-U.P. Code
  Listed by NSF to Commercial Hot

**Ratings**

- Cold working pressure: 250 psi
- EPDM = 0 – 250 °F
- FKM = 14 – 284 °F (with temp spikes up to 356°F)

Temperature ratings are dependent on sealing element and application.
Reference the approved applications sheet for MegaPress and MegaPress Stainless for more information.

Viega MegaPress 3-Piece Ball Valve
**Smart Connect technology**

DESIGNED FOR PEACE OF MIND

Viega’s Smart Connect technology is designed directly into the fitting, providing a reliable identification method. Smart Connect gives installers confidence that connections are made correctly, because unpressed connections are easily identified during pressure testing.

Identify an unpressed connection during pressure testing when water or air flows past the sealing element. Make the connection by using the press tool to press the fitting.

Smart Connect technology should be tested at 15 to 85 psi when testing with water, or 0.5 to 45 psi when testing with air. After ensuring that all connections have been correctly pressed, installers may increase the test pressure to full system test requirements.

“Another great advantage of Viega I really like is that the fittings are designed [with Smart Connect technology] so they won’t hold pressure if the fitting isn’t pressed. When you put air in the system, you know immediately if it’s installed correctly.”

– Nicholas Messenger, Owner, Kohler Fire Protection
Meeting the strictest standards

Viega ProPress and Viega MegaPress fittings have been tested to the strictest standards in North America. Viega ProPress in copper and two grades of stainless steel, 304 and 316, is suitable for nearly any application, from potable water in commercial projects to corrosive chemicals in industrial projects. Viega MegaPress in carbon or stainless steel can be installed in a variety of applications, or choose MegaPressG for gas applications. Viega has solutions for all your industrial, commercial, residential and marine projects.

Approvals and certificates for North America

- ASTM A240
- ASTM A312
- ASTM A403
- ASTM A554
- ASME B31.1
- ASME B31.3
- ASME B31.9
- American Bureau of Shipping
- NSF/ANSI 61 & 372
- Zero Lead Components
- CRN – Canadian Registration Number
- UL
- FM
- ICC International Plumbing Code
- UPC Uniform Plumbing Code
- PHCC National Standard Plumbing Code

Contact your local Viega district manager for details on local approvals.

Choose from three versatile sealing options

With a variety of sealing elements, Viega systems are approved for more applications than any other press system, ranging from potable water to corrosive chemicals. A proven pipe joining method used around the world, Viega press technology increases the benefits to installers and specifying engineers.

Viega fittings can be used with EPDM, HNBR or FKM sealing elements.
This document is subject to updates. For the most current Viega literature please visit viega.us

The term Viega does not apply to a specific company within the various separate and distinct companies comprising the Viega group of companies. The term Viega as used in this publication refers to the Viega brand itself or generally to the Viega group of companies. References to activities in North America specifically refer to activities of Viega LLC.

A green dot on a Viega ProPress, MegaPress fitting indicates Smart Connect technology with an EPDM sealing element. A yellow dot on a Viega MegaPressG fitting indicates Smart Connect technology with an HNBR sealing element. A white dot on a Viega ProPress or MegaPress (304 FKM) fitting indicates Smart Connect technology with an FKM sealing element. For a current list of applications, please visit viega.us/applications.

Zero Lead identifies Viega products meeting the lead-free requirements of NSF 61 through testing under NSF/ANSI 372 (0.25% or less maximum weighted average lead content).
