PRODUCT FEATURES

- Carbon steel alloy with corrosion-resistant zinc nickel coating
- Sizes and configurations from ½” to 4”
- HNBR sealing element for fuels and gases
- Graphite separator ring engineered to withstand high temperatures
- Most application approvals of any carbon steel press fitting system
- For use with ASTM Schedule 5 to Schedule 40 carbon steel pipe

PRODUCT APPROVALS

- Configurations include elbows, couplings, no-stop couplings, reducers, tees, reducing tees, adapters, reducing adapters, unions, caps and flanges
- Connections in 16 seconds or less
- Can reduce labor costs by as much as 60-90%
- Smart Connect® technology helps identify unpressed connections
- Approved for underground use according to local code

MEGAPRESS®

The safer, faster, cleaner way to connect gas pipe.

Testimonials

THE BIGGER PICTURE

“With Viega it flows. It would have made things 15 times more difficult, so we saved time to change the connections and get it all done in less time. Thank you so much for making the steel easy!”
- Steve Schreiner, Owner, Schreiner Mechanical Inc.

“It was the perfect scenario for this project. No hot work, and we saved all that weld time. Being able to press a joint and move on is a big difference. It made a really nice, clean job.”
- Phil Spaun, Project Manager, Leoback Inc.

“The time it takes with Viega, I can honestly do it twice as fast as compared to threading. There are no dents if you press it properly, so it’s a great product. Way better than anything else.”
- Joe McCarty, Foreman, New England Plumbing

“The first new barn we built has been in operation for about eight months. You can see the gas pipe rusting some – but the MegaPress fittings look brand new!”
- Barry Barnes, Superintendent, Rollins Construction

“If we’d had to thread this, it would have made things 10 times more difficult, so we would have had to change the connections in many areas. We were able to change the connections in a lot of areas, which made the job easier.”
- Phil Spaun, Project Manager, Leoback Inc.

MEGAPRESS®

The safer, faster, cleaner way to connect gas pipe.
EYE-OPENING TECHNOLOGY
Innovative Press Fittings

SAFER
Flameless connections eliminate the need for hot work permits and fire watch. No open flames mean other trades can work simultaneously and safely.

FASTER
Connections are made in just 16 seconds or less, saving you up to 60-90% on labor costs versus traditional methods.

CLEANER
Unlike traditional joining methods, MegaPressG doesn’t use any consumables, threading oils or breakaway plastic tabs, keeping job sites cleaner.

SMARTER
Smart Connect® technology helps easily identify unpressed connections.

MegaPressG is approved for connecting gas pipe up to 4", making it the first technology of its kind.

BIGGER
MegaPressG is approved for connecting gas pipe up to 4”, making it the first technology of its kind.

PRESS SAFER. PRESS BIGGER.
Strict deadlines and tight budgets demand efficient pipe connections. With Viega MegaPressG press technology, you can make flameless connections on ½" to 4" gas pipe in 16 seconds or less. MegaPressG saves you time and labor, so you can focus on the bigger picture.
