Connections without the mess
Use Viega MegaPress to make carbon steel connections and cut installation time by 50% to 90%, while dramatically reducing downtime and potential revenue loss. Using a tool and press jaws, one person can press a MegaPress fitting quickly and safely.

With threading:
- Pipe ends must be reamed, threaded and finished off with thread sealant
- More space required for necessary equipment
- Risk of contamination from cutting oil or filings

With Viega MegaPress:
- Viega’s flameless technology is safe in any environment
- No need for oil, filing or fire watch
- Smart Connect® technology helps easily identify unpressed connections

Viega MegaPress® Systems
Carbon steel connections in seconds

viega.us
Features and Benefits

The first and only press fitting for carbon steel pipe up to 4"
As the global leader in press technology systems for industrial, commercial and residential industries, Viega offers the first and only carbon steel press joining solution that covers multiple applications with Viega MegaPress, MegaPressG for gas systems, and MegaPress FKM.

- Suitable for use with Schedule 5 to Schedule 40 carbon steel pipe
- Compliant with fire sprinkler and gas codes
- Includes more than 500 different engineered fitting configurations ranging from ½" to 4"
- Viega Smart Connect® helps installers to easily identify unpressed connections
- Press connections made in seconds
- System-matched tools and jaws
- No firewatch
