**EN**

**Viega PureFlow Press by ProPress 2" Adapter**

1. Remove orange warning sticker from fitting prior to making a ProPress connection. Clean off any glue residue before making connection.
2. Square off tubing to proper length. Uneven, jagged or irregular cuts will produce unsatisfactory connections.
3. Insert fitting into tubing and engage fully.
4. Ensure full tubing insertion at view holes in attached press sleeve. Full insertion means tubing must be completely visible in at least two view holes and partially visible in the one.
5. Insert the appropriate PureFlow press jaw into the press tool and push in the holding pin until it locks.
6. Open jaw and position perpendicular over press sleeve resting it against the tool locater ring.
7. Start pressing process; hold the trigger until the jaw has automatically released.
8. When press connection is complete, open and remove jaw.

**WARNING!**

This fitting is designed for use with ProPress fittings only and not for use with solder fittings!

**CAUTION!**

Do not press twice.

---

**Viega PureFlow Press by ProPress Zero Lead 2" Adapter**

Viega products are designed to be installed by licensed and trained plumbing and mechanical professionals who are familiar with Viega products and their installation. Installation by non-professionals may void Viega LLC's warranty.

Zero lead identifies Viega products meeting the lead free requirements of NSF 61-G through testing under NSF/ANSI 372 (0.25% or less maximum weighted average lead content).

---

The tool locater ring must be in the factory installed position while making a press to ensure a consistent leakproof connection. It may be necessary to rotate the tool locater ring to avoid interference between the ring and tool.

---

See ProPress ½ to 2 Product Instructions for information on how to make ProPress connections.
