Viega PureFlow® Press Washing Machine and Ice Maker Boxes

1. Stud
2. Face plate
3. Backing board fastened between studs
4. Valve outlet
5. Solvent cement drain connection
6. Viega PureFlow press
7. PureFlow tube
8. Wall material

Use two nails or screws per bracket to secure the outlet box to the front of the studs. On the washing machine boxes, if necessary, cut or punch opening on the bottom of the box for the 2" plastic drain tube and solvent cement tube connection.

Prepare PureFlow tubing by squaring off to proper length. Uneven, jagged, or irregular cuts will produce unsatisfactory connections.

Insert PureFlow tubing into the attached PureFlow press sleeve on the valve(s).

Ensure that the tube is fully inserted by visually confirming that it appears in the view holes in PureFlow press sleeve. Full insertion means tubing must be completely visible in at least two view holes and partially visible in the one.

Position the PureFlow press tool perpendicular over the press sleeve, resting it against the tool locator ring. Make sure the PureFlow press tool is properly aligned (see step 9 if it is not).

Close the PureFlow press tool handles, using the trigger to reduce the grip span if desired.

Push face plate into the box until the plate is flush against the wall material.

WARNING! The connection is not leakproof when the tool has been opened by emergency release. The tool locator ring must be present to ensure a proper PureFlow Press connection.

The tool locator ring must be in the factory installed position while making a press to ensure a consistent leakproof connection. It may be necessary to rotate the tool locator ring to avoid interference between the ring and tool.

WARNING! Do not press twice!

When installing drywall, cut an opening (6⅝" W x 7⅛" H for the washing machine box and 5¼" W x 5¼" H for the ice maker box). Any gap between the drywall and the side of the box must be filled with drywall compound.

CAUTION! Do not press twice!

Push face plate into the box until the plate is flush against the wall material.
