ProPress® 316 Stainless Ball Valve
Model 4070

Description
Viega’s ProPress 316 stainless steel ball valve can be used in a variety of commercial and industrial applications. The EPDM sealing elements make it the perfect choice for potable water systems while the durable 316 stainless steel allows it to stand up to some of the harshest environments found in power plants, refineries, utilities, and mills. The double EPDM stem seals prevent leaks without the need for constant adjustment. The 316 stainless steel ball valves are available in sizes ranging from ½” to 2” and are equipped with Viega’s patented Smart Connect technology for easy identification of unpressed connections during pressure testing.
