Viega Technical Services

Training, design and technical support to fit industry demands
Viega Technical Services

YEARS OF EXPERIENCE BACKING YOU WITH SUPERIOR PRODUCT SUPPORT

Viega believes in industry-related education, providing a foundation our customers can build on, not just product-specific instruction. Viega Educational Facility attendees are able to take what they learn in our classes and expand their knowledge base as they continue throughout their careers.

No matter where you are in the country, Viega is working to provide a facility convenient to you. The Viega Educational Facility in Nashua, New Hampshire, has recently undergone a renovation that includes the addition of an Interactive Learning Center with state-of-the-art hands-on displays and learning tools. Coming soon, a facility in Broomfield, Colorado will be similarly equipped. Both locations will service all educational levels, from apprentices just beginning in the trades to industry veterans with years of experience. If you don’t find a course that fits your specific needs, we’ll create one for you. As industry requirements change, so do our offerings. Each year, we evaluate our existing courses and add new ones to encompass the latest technological advances and best practices in plumbing, heating and building construction.
At Viega, we continually strive to support our business partners. Our Design Services Team is always available to assist you with your NFPA 13D fire protection, radiant heating and cooling and plumbing projects. Read on for detailed information about each service, or email design@viega.us for assistance.
Fire Protection Design Services
With Viega NFPA 13D Fire Protection Design Services, submit your installation plans online and the Viega Fire Protection Design Team will create for you a drawing and materials list, as well as perform hydraulic calculations.

Radiant Design Services
The Viega Radiant Design Service performs heat loss calculations and designs for a properly functioning system. You’ll receive a system design specific to your project, along with a bill of materials containing tubing, manifolds, fittings, panels, controls and other miscellaneous materials.

Plumbing Design Service
The Viega Plumbing Design Service team knows that designing a plumbing system for a home can be a complicated process. The team offers take-offs for residential PEX plumbing systems, providing the customer with a CAD layout, materials list and prices they can use to submit for a bid on a project.
Viega offers a wide variety of courses in the following topics:

- Hydronics
- Pathogen Prevention
- PEX Plumbing
- PEX NFPA 13D Fire Protection
- Press Technology
- Radiant Heating & Cooling
- Snow & Ice Melting
- And much more!

Classes range from one day to five days. Pricing from $75 up, depending on class length, and add-ons available include hotel, airfare and tools.
Viega Technical Support

APPLICATION SUPPORT FROM TRAINED STAFF

Viega Technical Support Specialists are vital to the Technical Services Department and are well-versed in a wide variety of applications for all Viega systems, including our innovative new products. Our Technical Support Specialists have the ability to provide specific product support and also to assist with piping related issues.
The term Viega does not apply to a specific company within the various separate and distinct companies comprising the Viega group of companies. The term Viega as used in this publication refers to the Viega brand itself or generally to the Viega group of companies. References to activities in North America specifically refer to activities of Viega LLC.
