Shaping the future of press technology

Engineered for you

Viega pioneered press technology in North America in 1999 with Viega ProPress. Now more than 20 years later, Viega press technology makes consistent, secure connections possible on copper, stainless, carbon steel, copper nickel and PEX. No other manufacturer can offer similar press technology across multiple materials. Viega press systems also offer proven security through innovations like Viega Smart Connect technology, which is only available on genuine Viega press fittings. Installers can trust a Viega connection and finish a job without worrying, because Viega Smart Connect technology provides installers added confidence in their ability to ensure secure connections.

Integrated system solutions

Viega offers products including copper, stainless steel, carbon steel and copper nickel press fittings, along with a complete PEX plumbing system including water-distribution manifolds, tubing and press fittings. Our primary press solutions for metals are Viega ProPress and Viega MegaPress. Manufactured with different sealing elements, our fittings are for plumbing, mechanical and gas applications. The Viega PureFlow System is a complete PEX plumbing system that works seamlessly for potable water installations. Many Viega fittings are equipped with Viega Smart Connect technology, which helps installers easily identify unpressed connections during pressure testing. System-matched tools and jaws make it simple and easy to install the full line of Viega press technology for several applications on the same project.

Energy-efficient heating and cooling

Radiant heating systems have been around since 10,000 B.C., but Viega has made them more efficient and reliable, as well as easier to install. With options suitable for any application, Viega radiant solutions are perfect for new or remodel construction.
