

# MEGAPRESS® G VALVES

PRESS GAS FASTER.

# MORE CONFIGURATIONS AVAILABLE

THAN ANY CARBON STEEL PRESS FITTING SYSTEM.

Viega MegaPress® G valves are made from carbon steel alloy with a corrosion-resistant zinc nickel coating. A locking handle comes standard while an HNBR sealing element makes it ideal for fuels and gases. Press valves on ASTM Schedule 5 to Schedule 40 carbon steel pipe in seconds and reduce labor costs by up to 90% with Viega MegaPressG valves.

## PRODUCT FEATURES

- Available in ½" to 2" sizes
- For use with ASTM Schedule 5 to Schedule 40 carbon steel pipe
- Carbon steel alloy with corrosion-resistant zinc nickel coating
- HNBR sealing element for fuels and gases
- Available in PxP, PxPFT, PxMPT and PxGJ configurations

### SAFER

Flameless connections eliminate the need for hot work permits and fire watch. Without open flames, other trades can work simultaneously and safely.

### FASTER

Save up to 90% more time versus traditional methods.

### SMARTER

Viega valves come equipped with Smart Connect® technology to help you quickly identify unpressed connections.
