PULP + PAPER

SOLUTIONS

— MAXIMIZE MILL OUTPUT WITH VIEGA® PRESS TECHNOLOGY

Increase safety. With no hot work, fire watches are unnecessary. That means a safer installation environment by eliminating volatile organic compounds and toxic fumes and extensive equipment needed for traditional methods.

Maximize uptime. Viega products are ideal as critical spares and can be pressed in seconds wet or dry, during scheduled or unplanned downtime. There is no need to drain the full system and pressure tests can be performed immediately.

Proven mill quality connections. Unlike groove or threaded connections that reduce pipe wall thickness, Viega fittings preserve pipe integrity. Our fittings come factory assembled for maximum consistency and avoiding rework. Viega press fittings & valves are manufactured in an ISO 9001 certified facility, resulting in high-quality, durable products.

Complete work in less time. Execute shutdown efficiently and reduce outage cost. Save up to 90% on install time compared to traditional methods, improving budget control, overall outage cost and equipment reliability. Whether connecting piece-by-piece or during prefabrication, Viega offers flexibility to improve project completion.

Improve labor utilization. Skilled labor shortage affects work completion and impacts project timelines. With Viega's training program, your team can be fully trained and ready to install press fittings with a single, one- hour session. Because our full-system solutions are installed without hot work and can be quickly learned, Viega allows you to optimize your team's time.

MEGAPRESS® STAINLESS 304 + 316

SEALING ELEMENTS: FKM, EPDM
MATERIAL: 304 OR 316 STAINLESS
PRESSURE: 200PSI
SCH: 5 - 40
SIZE: ½" - 4"

The primary solution for the pulp & paper industry, Viega MegaPress stainless offers a solution from mill and potable water to caustics and acids for breaking down pulp in digesters. Viega MegaPress stainless offers rugged durability, standing up to the toughest applications.

MEGAPRESS®

SEALING ELEMENTS: FKM, HNBR, EPDM
MATERIAL: CARBON STEEL
PRESSURE: 200PSI
SCH: 5 - 40
SIZE: ½" - 4"

Ideal for facility utility needs, the Viega MegaPress system is consistent, flameless, and reliable. Most often used for natural gas, hydronics, and compressed air, MegaPress leaves no joining material buildup, exposed threads or tarnish, creating a clean professional appearance. Plus, with MegaPress press-in branch connectors, welded branch connections are a thing of the past.

PROPRESS® 316

SEALING ELEMENTS: FKM, EPDM
MATERIAL: 316 STAINLESS
PRESSURE: 200PSI
SIZE: ½" - 4"

Designed for Copper Tube Size (CTS) Viega ProPress Stainless is engineered for harsh industrial environments where the piping systems may come into contact with corrosive cleaning liquids. Available in 316 alloy, Viega ProPress stainless is a great option for water, air, acidic, and cleaning solution applications while being light and easy to work with.

PROPRESS®

SEALING ELEMENTS: EPDM
MATERIAL: COPPER
PRESSURE: 300PSI
SIZE: ½" - 4"

Viega ProPress is suitable for many pulp & paper mills. As with any Viega press solution, connections are made in seconds, making Viega ProPress ideal for standard applications including office space, lavatories, water and air.

Viega ProPress and MegaPress systems are approved for over 2,500 standard and non-standard applications. Visit viega.us/industrial for more information.
