RESIDENTIAL HEATING + COOLING SOLUTIONS

CLIMATE CONTROL WITH VIEGA® RADIANT SYSTEMS

Improves the environment, inside and out. Zone control options provide flexibility for controlling the temperature in different areas within a home at once. These highly efficient operating parameters can ultimately reduce energy consumption.

Greater climate control. A radiant system warms or cools various surfaces in a room, instead of heating or cooling the surrounding air. The result is a comfortable temperature that covers the entire space without variation or the loud sounds of forced-air systems.

Spreads comfort, not dust or pollen. By reducing the amount of air being circulated, radiant heating and cooling improves the air quality within a space. Improves the air quality within a space by spreading fewer pollutants including allergens, viruses, and odors.

Safe, secure, end-to-end solutions. A full line of prefabricated climate mats for wet installs, radiant snow melt systems, panels for dry installs, tubing, manifolds, mixing options, and controls all engineered to work together.

viega

CLIMATE MAT

A pre-engineered mat that simply needs to be unrolled and fastened, saving time and labor costs. This system can allow for 20,000 sq. ft. of tubing to be installed in an average workday.

MANIFOLD

Comes equipped with an air bleeder, supply shutoff, purge valve, and balancing valve to round out your radiant system.

RAPID GRID

An all-in-one insulated vapor barrier and grid system compatible with Viega Barrier Pex. Viega Rapid Grid serves as a fastener, insulation and vapor barrier and can reduce installation time.

BARRIER PEX

Barrier PEX is our premier solution for hydronic heating and cooling systems. Barrier PEX is manufactured with an oxygen barrier layer that helps restrict the passage of oxygen through the wall of the tubing.

CLIMATE PANELS

Easy to install and can be customized to suit any floor plan, under any floor type. Available assembled or unassembled for new or remodeled homes and businesses.

HYDRONIC MIXING BLOCK

Combines mixing, control, air elimination and a pump in a single unit. It's a first-of-its kind, user-friendly solution for controlling a radiant heating system.

INSTALL STORY

“

Radiant systems offer a potential of 81% energy savings for heating and 46% for cooling, according to Department of Energy researchers.

”

Engineering Services

Our dedicated Engineering Services team can help complete your next plumbing, radiant, and snow melt project. They work with you to provide a complete fitting material list, model, and cost comparisons for press vs. alternative installation methods.

Viega Works Session

Can't make it to one of our Seminar Centers? No problem. Our trainers bring real-world experience and industry knowledge to your location via video call in a working session tailored to your needs.

Technical Support

Our Technical support team has you covered if you need quick answers to on-the-job questions. Each technician provides detailed troubleshooting and solutions to application questions.

On-Demand Accredited Courses

Contractors can get on-demand access to modules for continuing education, credentialing of Viega products and industry applications through the Viega eLearning portal.

In-Person Training

The Viega Training team provides a hands-on experience in well-equipped labs and seminar spaces for customers in Broomfield, CO and Mantua, OH.

VIEGA® PRESS TECHNOLOGY

No other manufacturer can offer the same press technology across multiple piping systems.
