

Tech Data

Viega MegaPress® Press-in Branch Connector

The MegaPress Press-in Branch Connector is designed for schedule 10 and schedule 40 carbon steel pipes. The press-in branch connector creates a 3/4" NPT threaded connection in accordance with ASME B1.20.1. It is particularly suitable where space

is at a premium, e.g. in pipe manifold installation for sensors, thermometers or drains.

A separate press-in branch connector is available for the different pipe dimensions. The press-in branch connector is fitted with a sealing element made of EPDM or FKM. The press-in branch connectors are marked with a green dot for EPDM and a white dot for FKM.

The Viega MegaPress Press-in Branch Connector requires no welding and poses no fire hazard, which is particularly important in restoration or retrofit work. The press fittings are installed with a battery-powered or corded pressing tool.

The advantages of installing Viega MegaPress fitting system include:

- Up to 60% time savings
- Proven joining technology
- Technical field support
- No fire watch needed
- No special certification required

Approved Piping

The Press-in Branch Connector can be used with the following seamless steel pipes or steel pipes welded along the longitudinal seam:

- Black
- Galvanized
- Industrially painted
- Powder coated

Technical Data

Operating pressures for all models:	200 psi max.
Test Pressure:	Up to 600 psi max.
Operating Temperatures for models 4812.2 & 4812.25 with FKM sealing element:	284° F max.
Operating Temperatures for models 4812.3 & 4812.35 with EPDM sealing element:	250° F max.

Features

- Available in sizes 1½" to 4", and 6"
- The Press-in Branch Connector has an external zinc nickel coating

Tools Required

- Press-in Branch Connector Tool Kit (Part No. 26920)
- Standard size press gun (compact press tools not for use with Press-in Branch Connector Tool Kit)
- Drill with 3/8" chuck or larger
- Suction device, e.g. shop vacuum
- Adjustable wrench
- Sandpaper or wire brush
- Marking pen
